

The replacement of a driveway requires the new driveway to conform to all specifications adopted by the City. Now driveways must abut the backside of the curb and gutter as shown in Figure 1. In the case where the existing driveway is cut into the street, as in Figure 2, the curb and gutter section must be replaced to conform to Figure 1. If the curb and gutter must be replaced, it shall be done so that not less than 3 feet remains to the next joint, as shown in Figure 3.
