Street Ratings
Fall of 2017
Streets are rated based on usage and how degraded the pavement is. **Red** are streets that are in very poor condition. **Green** are streets in relatively good condition.

This rating helps engineering staff to determine which streets to repair. Along with the rating, staff must consider a number of other factors, including, but not limited to, need for sidewalks/ADA compliant ramps, budget impact, and other projects needed in the area.
Resurfacing Street Projects 2008-2017 with the proposed 2018 Streets

This map indicates the streets that have been repaired as part of the Street Resurfacing Projects since 2008, as well as the proposed streets for the 2018 Project.
